

Industrial risks, including more highly toxic fires, are on the rise, so users require increasingly high-performance professional equipment. MATISEC meets their needs by designing, developing and manufacturing self contained breathing apparatus ( SCBAs) that are hardy, ergonomic and include the latest technologies.

## SCBA TRIPLAIR

TRIPLAIR is an open-circuit insulating respiratory system that provides long duration autonomy ( 60 minutes ) using a cylinder unit holding 3 compressed air cylinders with a capacity of 3 litres at 300 bar each (i.e., a total of 9 litres at 300 bar) protected in an anatomical ABS backpack .Specially develop and designed for the French Navy it allows the wearer to pass thru very narrow passageways and gallery.
