

With the increase in industrial risks, the harmfulness of modern fires and the professionalism of users, MATISEC designs and manufactures Insulated Breathing Apparatus combining robustness, ergonomics and new technology. Recognised by many fire brigades, the Navy...

M20.2

The M-20 self-contained escape device is the smallest in the world. Compact, lightweight and ergonomic, it can be worn comfortably on a belt or stored in a wall-mounted waterproof box. It isolates the user's airway from the surrounding atmosphere using compressed oxygen for up to 32 minutes. Much more effective than a filtering device, it protects against a lack of oxygen, as well as against toxic gases and particles.
