

Industrial risks, including more highly toxic fires, are on the rise, so users require increasingly high-performance professional equipment. MATISEC meets their needs by designing, developing and manufacturing self contained breathing apparatus (SCBAs) that are hardy, ergonomic and include the latest technologies.

Air line MATAIR

The MATAIR is a compressed air line breathing apparatus with complete mask for respiratory protection named TOTAL 3 according European standard NF EN 136. The respiratory protection is insured with on demand positive pressure.
