

Various heat form (direct flame, steam, thermal convection ....) protection clothes developed and manufactured by MATISEC for extremes conditions.

---

## FIRE AND HEAT PROTECTION

### ▶ APPROACH FIRE CLOTHING

The approach fire clothe is used for specialized missions in fire fighting including rescue, extinguish in very extreme conditions, and protect for very high temperature, convective and radiant heat, and flame contact.

### ▶ FIRE ENTRY CLOTHING

Almost identical than approach suit the fire penetration clothe is made of multi layer complex allowing the user to stay during a limited time at the direct fire contact....

### ▶ STEAM INTERVENTION SUIT

Steam protection suit, is specially designed and ventilated to work on a steam network leak in order to plug a hose leak or repair hand wheel valves....It is mainly used in nuclear power plants....
