

Our years of research and innovation in the nuclear field have instilled in us a protective instinct- a commitment to protecting you now and in the future.....

NUCLEAR PROTECTION

▶ AIR-FED HOODS

Matissec design and manufacture ventilated PPE to protect people working in contaminated environments. We use flame-retardant, reinforced materials and high-tech plastics to continually enhance the reliability of our protective suits. All our protective hoods meet the requirements of applicable standards, EN 1073-1, EN 943, EN 270.

▶ AIR-FED ENCAPSULATED SUITS

Matissec design and manufacture ventilated PPE to protect people working in contaminated environments. We use flame-retardant, reinforced materials and high-tech plastics to continually enhance the reliability of our protective suits. All our protective suits meet the requirements of applicable standards, EN 1073-1, EN 943, EN 270.

▶ BREATHING AIR TREATMENT

Matissec, leading manufacturer of ventilated suits and hoods, now provides a complete line of 100% reliable PPE, tubes and secure filtration posts in conformity with EN 14593/EN14594.
