

In 1980 in order to complete its know-how and range of human protection MATISEC has created Respiratory Protection department. Using technologies coming from aerospace side, this powered branch of Matisec activity is always renewed and developed to serve better our customers with new technologies

TOUS LES EQUIPEMENTS DE PROTECTION RESPIRATOIRE MATISEC

▶ SUPPLIED AIR RESPIRATOR

Industrial risks, including more highly toxic fires, are on the rise, so users require increasingly high-performance professional equipment. MATISEC meets their needs by designing, developing and manufacturing self contained breathing apparatus (SCBAs) that are hardy, ergonomic and include the latest technologies.

▶ AIR-PURIFYING RESPIRATORS

Directly issued from self contained BA development, the filtering BA gather benefits issued from respiratory MATISEC knowledge. All are fitted with standard EN148-1 thread allowing to use a large range of canister.
