

Matissec, leading manufacturer of ventilated suits and hoods, now provides a complete line of 100% reliable PPE, hoses and secure filtration posts in conformity with EN 14593/EN14594.

Case with motorised reel

The air breathable case with motorised reel is equipped with a motorized retractor. It is intended to facilitate the work when decontaminating the bottom of a nuclear power plant pool. This equipment is designed to work with UFS and SPMB

UFS

Unit designed to provide breathing air for 3 users of protective equipment operating on inducted air, under secure conditions (

SPMB

The SPMB (Source Portable Multi-Bottles) is placed in substitution of the spare bottles of the UFS or the BFS. It increases the respirable air backup capacity of the latter.
