

Matisec design and manufacture ventilated PPE to protect people working in contaminated environments. We use flame-retardant, reinforced materials and high-tech plastics to continually enhance the reliability of our protective suits. All our protective suits and hoods meet the requirements of applicable standards, EN 1073-1, EN 943, EN 270.

MATIVENT HOOD

The MATIVENT hood, designed to withstand harsh conditions, sits perfectly on the wearer's shoulders thanks to its supple, one-size-fits-all bib. It meets the requirements of standards EN1073-1, EN270 and EN143. Its light weight is an incomparable advantage.

BFS

Unit designed to provide breathing air for 2 users of protective equipment operating on inducted air, under secure conditions (one cylinder HP emergency back-up cylinders and alert mechanisms th

UFS

Unit designed to provide breathing air for 3 users of protective equipment operating on inducted air, under secure conditions

Hoses

The air hoses MATISEC are designed both regarding raw material of the hose, nipple diameter and length in order to offer the minimum pressure drop.

Air heater

Recently designed by our research and design department the air heater insure a comfortable breathing air temperature to the PP
